

MULTIBOARD®

Multiboard® EcoFrost

FOR CHILLED AND FROZEN FOOD

Multiboard® EcoFrost

FOR CHILLED AND FROZEN FOOD

It takes a special kind of board to package frozen and chilled food. The packaging product must not affect the flavour of the packaged products, and for chilled food the packaging must be moisture-resistant. Multiboard® EcoFrost provides effective protection for its contents with moisture-resistance also in the board's cross-section. The fact that Multiboard® EcoFrost is manufactured from 100% recycled fibre provides clear environmental benefits, in line with today's demands for a sustainable society.

- **Strong Nordic fibres** make Multiboard® EcoFrost one of the market's strongest board qualities based on recovered fibre. This means that it can often be selected with the same or lower grammage than other board qualities while still achieving the desired stackability.
- **Smooth runnability through packaging machinery.** Multiboard® EcoFrost withstands powerful, repeated folding without splitting or wearing. The layer composition is delaminated in a well-defined line. This gives Multiboard® EcoFrost high performance on both printing and packaging lines.
- **Excellent stackability.** Multiboard® EcoFrost's multi-layer design and its fibre composition provide excellent stackability.
- **100% recycled fibre.** The fact that Multiboard® EcoFrost is manufactured from 100% recycled fibre provides clear environmental benefits.

Multiboard® EcoFrost is available for the grammages 280, 300, 325, 350, 375, 400, 425 and 450 gsm.

Multiboard® EcoFrost is suitable for frozen and chilled food.

Multiboard® is a range of strong, environment-friendly, value-for-money packaging boards that have been developed for creative, functional packaging solutions.
