

SUSTAINABLE STRENGTH

# Multiboard® Premium

## For decorative printing

Multiboard® Premium is a high quality cartonboard combined with metallised polyester foil laminated on the print side or the reverse side according to customer requirements. Multiboard® Premium provides excellent conditions for decorative printing where a luxurious appeal is required. Moreover, polyester foil has excellent barrier properties.

- **Strong Nordic fibres** make Multiboard® Premium one of the market's strongest board qualities based on recovered fibre. This means that it can often be selected with the same or lower grammage than other board qualities while still achieving the desired stackability.
- **Smooth runability through packaging machinery.** Multiboard® Premium withstands powerful, repeated folding without splitting or wearing. The layer composition is delaminated in a well-defined line. This gives Multiboard® Premium high performance on both printing and packaging lines.
- **Excellent stackability.** Multiboard® Premium's multi-layer design and its fibre composition provide excellent stackability.
- **100 % recycled fibre.** The fact Multiboard® Premium is manufactured from 100 % recycled fibre provides clear environmental benefits.

**Multiboard® Premium** is suitable for cosmetics, confectionary, wines and spirits, gift packages as well as medical products
